

# ABSTRACT

## DEVELOPMENT OF PADDY HARVESTING MACHINE (RUBBER ROLERS)

Main aim of this project is to design low cost multipurpose mini combined harvester for production using locally available materials at affordable cost. This system will improved performance and low cost maintenance of harvester for use by farmers in developing agriculture. The research ensures the use of mechanised farming equipment's designed and developed from local materials for effective harvesting and transportation of agricultural produce. This method which develops the technology in agriculture.
